

# Rectangular duct silencers

## SLC/SRC/SPC

### Description

The SLC and SRC rectangular duct silencers reduce the noise level in ventilation and A/C systems. This silencer type is usually installed between a fan and an air supply or exhaust duct, and upstream of air supply vents.

All silencers are made of a housing and inner baffles. The housing is made from galvanized steel sheet and its ends are framed with steel sheet angles.

All baffles inside the silencer have a round breast at one end and comprise a galvanized steel frame with a sound-insulating insert which absorbs the acoustic energy from the air flow. The sound-insulating insert is a set of non-flammable mineral wool panels. The outer surface of the sound-insulating insert is lined with a special abrasion-resistant textile to protect the mineral wool from wear and tear. The mineral wool panels are finished with a glass fibre lining in black; this lining is suitable for systems with a maximum air flow rate of 20 m/s. The maximum heat medium temperature is 250°C. The product is non-flammable.

The products with larger dimensions  $a$  and/or  $b$  feature compound baffles.

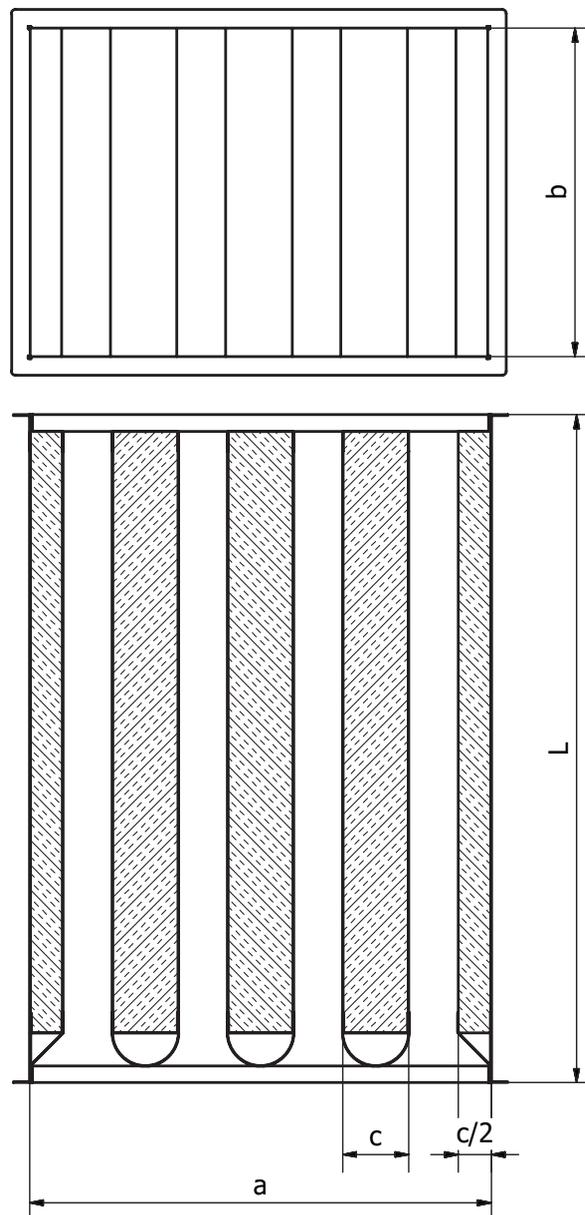

There are three baffle design types:

- L — sound-absorbing baffles;
- R — sound-absorbing resonator baffles;
- P — perforated sound-absorbing resonator baffles

The baffle spacing  $s$  ranges from 40 to 100 mm. The baffle surfaces should be protected against damage during transport, storage and on-site installation of the silencers.

The SLC, SRC and SPC rectangular duct silencers are installed in the ductwork with the baffles upright.

### Description

#### Available materials — Product code examples

SLC..... — Z275 galvanized steel sheet  
 SLK..... — 1.4301/304 stainless steel sheet  
 SLM.....- 316L — 1.4404/316L stainless steel sheet  
 SLA..... — 0.8 to 1.0 mm thick aluminium sheet

Other stainless steel sheet grades: please submit a request for quotation to determine manufacturability.

#### Product code example:

Product code: SLC - 10 - 04 - 0800 - 0400 - 0500

Type L baffle

Type R baffle

Type P baffle

Material

c — 100 baffle thickness

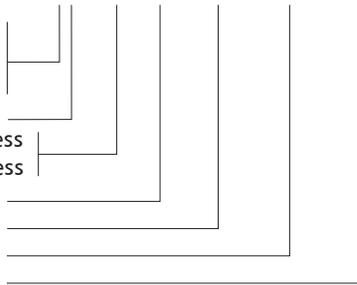

c — 200 baffle thickness

Number of baffles

width a

height b

length L

#### Product code example:

Silencer with 100 mm thick type L baffle, 4 baffles:  
 SLC-100-4-0800-0400-0500

### Manufacturability

#### Material:

Z275 galvanized steel sheet

0.8 to 1.0 mm thick aluminium sheet

1.4301 stainless steel sheet

1.4404 stainless steel sheet

Other stainless steel sheet grades: please submit a request for quotation to determine manufacturability.

#### Number of baffles:

Silencer with 1 baffle: 2 half-baffles at the duct sides

Silencer with 2 baffles: 1 full baffle + 2 half-baffles at the duct sides

Silencer with 3 baffles: 2 full baffles + 2 half-baffles at the duct sides

Silencer with 5 baffles: 4 full baffles + 2 half-baffles at the duct sides

#### Baffles:

Mineral wool: rock or glass wool; other insulators, e.g. expanded PVC or as supplied by the customer.

Baffle thickness: 40 mm to 300 mm with type N3 lining or type G9 washable lining.

Mineral wool density: 40 to 100 kg/m<sup>3</sup>.

The baffle front breast is curved to reduce the air flow turbulence and pressure loss.

#### Dimensions:

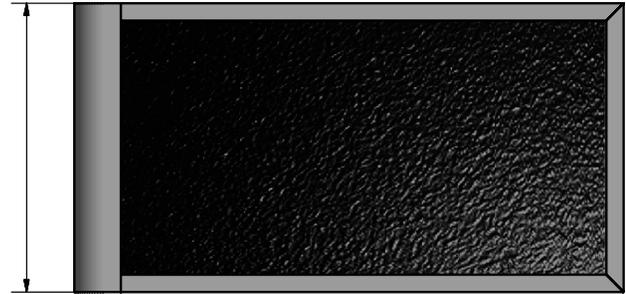

PQ frames: see the standard dimensions of square ducts. Other versions are available on request.

Front-to-back baffles: stops 1 to 3 cm before the PQ angle at the edge.

### Silencer baffle types

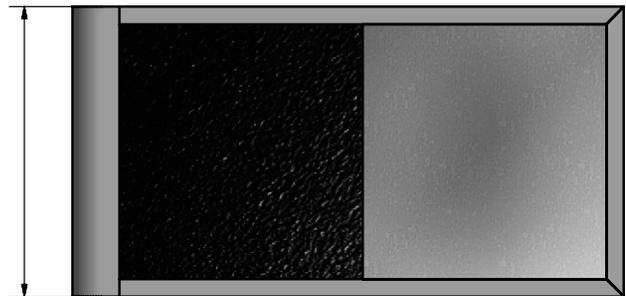

#### SLC

Silencer with sound-absorbing baffles — steel frame + mineral wool in lining: This baffle type is generally used for sound insulation at low and medium frequencies.

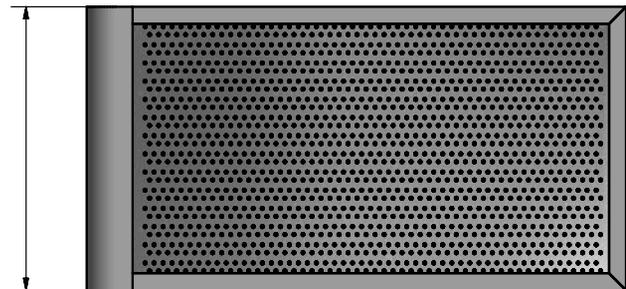

#### SRC

Silencer with perforated sound-absorbing resonator baffles — steel frame + mineral wool in lining + ½ of baffle length covered with steel sheet: This baffle type is generally used for sound insulation at medium and high frequencies.

#### SPC

Silencer with perforated sound-absorbing resonator baffles — steel frame + mineral wool in lining + baffle covered over its entire length with perforated steel sheet at an open surface area ratio of 36%:

## 3-baffle rectangular duct silencer
