Site Characteristics and Constraints The application site relates to a small paddock to the rear of Firs Farm. The site lies within both the Over Norton Conservation Area and Cotswolds AONB. Firs Farmhouse is Grade II listed and the Grade II Listed 'Three Chimneys' sits some 15m west of the proposed shelter. Planning Merits The applicant has submitted a permitted development check prior to the submission of this preapplication enquiry. It has been established that the proposed development will require express planning consent. In this instance a full application will be required. In terms of visual and heritage impact, the site sits in relatively close proximity to two listed buildings as well as within the Over Norton Conservation Area. Therefore, the proposed scheme must demonstrate that it will preserve or enhance the setting of these designated heritage assets. The proposed building would be visible in views into the Conservation Area from a Public Right of Way (PRoW) that runs across a field to the east of the site however, due to the rising topography of the land and scale of the building, the proposed shelter will not appear prominent in views into the Conservation Area from the PRoW. Further, agricultural-type timber buildings of utilitarian character and modest massing/form are not uncommon features on the periphery of rural settlements such as Over Norton. In light of this, it is my opinion that the setting of nearby heritage assets would not be significantly impacted. With regard to neighbourly amenity, the proposed building itself is unlikely to result in any significant loss of light, overbearing or overlooking impacts due to its height and proposed use. A full assessment, including the potential for noise disturbance, will be carried out as part of the forthcoming application. All necessary statutory and internal consultations will be conducted upon the submission of a formal application.

It is an important principle of decision-making that the process is open and transparent.
