

Traffic Management Plan

The Hammer and Pincers Inn, Preston le Skerne, Newton Aycliffe DL5 6JH

Devised: 29th October 2021

Revised: 26th February 2022

The Management of Traffic arising from events

Events taking place at the Hammer and Pincers in addition to the usual pub trade will incur an increase in vehicles needing parking space and people moving around the site.

This traffic management plan details how:-

- The expected increase of vehicles will be managed with the intention that staff and customer's vehicles are parked safely on site and not on the public highway.
- Pedestrians on site will be kept safe when walking across the car parks

Parking will be provided for customer and staff vehicles in the car park directly in front of the pub and in a further overflow car park located in the campsite, accessed from the main pub carpark. If further parking needs are anticipated, then vehicles will be parked on signposted periphery areas of grassland in the 3.5 acre caravan/campsite.

There is a designated walking path linking the campsite carpark directly to the front of the pub, avoiding the vehicle route from pub car park.

Parking bays will guide customers to park in the most efficient way to optimise space available.

A signposted one way system will be introduced, further signage located at pub carpark entry point will request customers to use campsite overflow carparking if the pub carpark is full and to not park on the public highway.

Signage will be used to direct customers to the safest walking route from the campsite carpark.

Car parks will be lit adequately when it's dark.

In expected busier times marshals will be employed to control and manage the carparks and pedestrians and vehicle entry/exit onto the highway. If necessary, barriers will be used to further direct and control vehicle movement.

Arial Photo's taken February 2021

Pub carpark = 22 spaces

Blue area is the new stoned campsite carpark with 20 spaces, (see further photo's below),
red area is peripheral grass parking with space for 30 cars.
