Dear Sirs,

**SHIERGLAS QUARRY
CONSTRUCTION AND OPERATION OF PROPOSED REPLACEMENT ASPHALT PLANT
ADDITIONAL INFORMATION
REF: 22/00434/FLL**

Please find attached, as requested, the following information;

1. Amended plant elevations as to read as N/E/W/S (VG235/PA/F/04 & 05);
2. Scaled elevations and floor plan for the proposed office building (VG235/PA/F/06);
3. Existing and proposed cross section drawing (VG235/PA/F/07). As described in the planning application statement, soils will be placed on the regraded site batters, with any excess overburden materials placed in the quarry landscape mound to the south in accordance with the extant consent 18/00073/FLL. This lowers the base elevation of the asphalt plant, assisting in the minimisation of landscape and visual impacts.
4. Technical specification document for the proposed weighbridge;
5. Updated plans with amended red line boundary incorporating access from the application site to where the existing permitted quarry boundary meets the external road.

We believe this provides all the information requested.

Yours sincerely

Michael Galt
Planning & Minerals Surveyor
