

Proposed Bathroom - view showing all fittings and cupboard storage running along and under existing beams

Proposed Bathroom - view showing restrictions of head height when retaining exposed room beams along side new velux window

Proposed Bathroom - typical indication of artificial lighting being used in a night-time scenario. Well lit facing rear end of room

Proposed Bathroom - view highlighting improve access when bath is installed. Scene highlights lighting at early morning

Proposed Landing - view showing changes in floor level and head height to allow for improved access into and across the loft

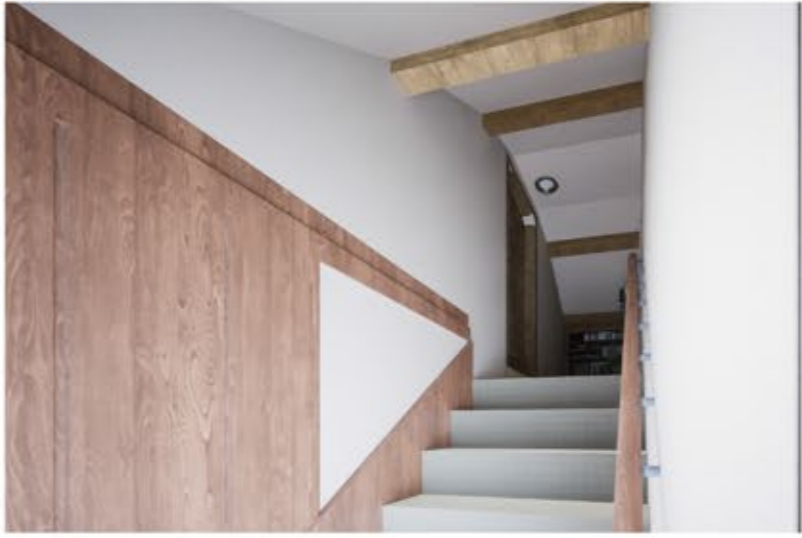

Proposed Bedroom - view to highlight spatial requirements of room when double bed is used in room. Room to stay mainly as existing

Proposed Bedroom - indicative view highlighting the retention of all roof beams while adjusting the line of sight between two loft areas

Proposed Bedroom - view to highlight the creation of the new roof light at the rear side while also increasing available storage

Proposed Staircase - view to show how reducing the landing height will allow for improved access along staircase
