

Method Statement for the maintenance of Woodhouse Farm Close Residents footpath.

1. Following completion of the new footpath, there will be monthly visual inspections to check the condition of the footpath and ensure it is clear and passable and safe for use.
2. Any works needed will be undertaken by the Management Company.
3. It is unlikely that any major works will be needed for the foreseeable future, as the initial installation will be carried by an approved contractor [REDACTED].
4. The lighting will also be checked on a regular basis. The lights may need to be replaced more regularly.
5. An inspection book will be kept confirming inspection dates and will be signed and dated.

This will also be kept for Health and Safety purposes.
