

Design and Access statement for Applying 12 solar panels to the roof of the car port of ;

The Wyndies , Crow street , Henham , Essex CM226AH .

Proposed application for 6 solar panels to be attached to each side of the Carport roof.

ACCESS .

There would be no impact on Access to the property.

There would be no impact on biodiversity issues.

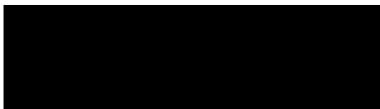

DESIGN.

These solar panels would be visible to my neighbour Dr P Mistry on the East side , and to my neighbours Mr and Mrs Tasker on the West side , all of whom have confirmed that they would have no objection.

The West facing roof of the carport is visible from the road (Crow street) . I have attached photos illustrating the view from the road.

It would not affect the main part of the dwelling which is listed. The car port is separate.

Photos will accompany this statement .

Dr Miranda Roberts
