Description of Proposed Works

Please describe the proposed works

We currently have a small patio garden which is level with our double garage roof, due to the house being on a hill.
In order to maximise space and increase our garden for our family we would like to extend the garden out on to the garage roof. This will all be on the existing level and will look like a continuation of the garden.
This will include additional supporting internal walls being built on the inside the garage, as recommended by structural engineer and building regs.
Take off existing roof, add additional supporting beams.
Re-board the roof, to include drainage etc. and finish with suitable flooring.
Add metal posts fixed to garage walls to support the fencing at recommended safety height, at least 1.1m high.
Build metal fence frame which will be clad in timber to match existing fence to form a uniform look.
