Foul Drainage Assessment Form (FDA1)

Please note: this form should be used for planning related queries only and cannot be used when applying for a Consent to Discharge.

APPLICANT DETAILS	
Name: Mr Derek Milne	
Address: Moor Cottage,	1, Benridge Moor, Morpeth, Northumberland NE61 3SD
Telephone No/e-mail : de	rekmilne2017@outlook.com

This form should be used in order to establish whether non-mains drainage, either a new system or connection to an existing system, would be acceptable, your answers to the following questions will be taken into consideration. It is important that you provide full and accurate information. Failure to do this will delay the processing of your application.

You must provide evidence that a connection to the public sewer is not feasible. Other than very exceptionally, providing non-mains drainage as part of your Planning or Building Regulation application will not be allowed unless you can prove that a connection to the public sewer is not feasible. Non-mains drainage systems are not considered environmentally acceptable in publicly sewered areas. Please note that the existence of capacity or other operating problems with the public sewer are not valid reason for non-connection where this is reasonable in other respects.

Where connection to the public sewer is feasible, agreements may need to be obtained either from owners of land over which the drainage will run or the owners of the private drain.

Government guidance contained within DETR Circular 03/99/ WO 10/99 'Planning requirements in respect of the use of non-mains sewerage incorporating septic tanks in new development' gives a hierarchy of drainage options that must be considered and discounted in the following order:

- 1 Connection to the public sewer
- 2 Package sewage treatment plant (which can be offered to the Sewerage Undertaker for adoption)
- 3 Septic Tank
- 4 If none of the above are feasible a cesspool

You must respond to all the following questions, if you wish to submit additional information please do so, marked clearly "Additional Information". In some cases you will be required to provide a further assessment in accordance with the requirements of DETR Circular 03/99/ WO 10/99 (see Guidance Note 1).

Mains connection	YES	NO
Have you provided a written explanation of why connection to the mains sewer is impractical with this form?	Yes	
This should include a scaled map showing the nearest mains connection point - check with your local sewerage undertaker.		

Non-mains connection

Please provide a plan with dimensions that clearly shows the location of the whole system in relation to the proposed development and the position of the key elements e.g. septic tank, drainage fields and points of discharge.

Proposed siting of package plant is as shown on plan.

bo you intelly to use all existing non-mains foul drains	YES	S NC
Do you intend to use an existing non-mains foul drainage system? If YES, does the system already have a Consent to Discharge issued by the Environment Agency?	Yes

Foul drainage form 1351186		
Will it be at least 10m from a watercourse, permeable drain or landdrain?	Yes	
water supply (e.g. well, borehole or spring)? This includes your own or a peighbour's	Yes	
drainage discharge system (other than the subject of this application) on either your own or a neighbour's property.		No
Will it be at least 15m from any building?	Yes	
Will there be any water supply pipes or underground services within the disposal system, Other than those required by the system? (For cesspools write N/A)	103	No
Will there be any access roads, driveways or paved areas within the disposalarea? (For cesspools write N/A)		No
8. Siting of treatment plant, septic tank or cesspool	YES	NO
is it at least 7m from the habitable part of a building?	Yes	140
Will there be vehicular access for emptying within 30m?	Yes	
Can the plant, tank or cesspool be maintained or emptied without the contents being taken Through a dwelling or place of work?	Yes	
9. Expected flow		
Please estimate the total flow in litres per day (see Guidance Note 4).		
1.65m³ daily output		
10. Maintenance		
How do you propose to maintain the system? 6 monthly inspection regime		
Declaration I declare that the above information is factually correct.

Additional Information to Question on Mains Connection

There is no mains sewer available within c 250 metres of the site.

Percolation test and trial hole results are not required by NCC for minor developments.
