

Proposed extension to Old Brewers, Brewers Lane, Monkwood SO24 0HQ.

Soils Management Plan.

Proposals.

Erection of a new rear extension on an existing lawned area of the rear garden.

Soil removal.

The topsoil will be removed and distributed across the garden in an appropriate location. There is a minimal area of new foundation work to be carried out and this will result in the generation of some spoil which will be distributed around the existing garden. Any surplus spoil will be responsibly disposed of by the builder in an appropriate off site collection point. The quantities involved for these minor works will be minimal. Furthermore the disturbed soil involved will not contain any toxic elements.

April 2022.
