

## Firebob Install

This shows a typical pitched roof installation.

Flat roof installation is the same.

Please contact us if you'd like to discuss variations on the install.

## Ceiling Bracket

Fix the custom-made bracket to your ceiling joists/rafters/trusses (we'll make a bracket to suit your roof timbers or steel structure).

## Ceiling Bracket

Plumb the bracket to make sure it is vertical.

Once the bracket is in place then the ceiling can be plastered around the bracket if required.
