[Reviews](#)

- Hot dip galvanized steel framing
- Hot dip galvanized steel cladding panels with a tough epoxy resin coating inside and out
- Attractive grey colour to external cladding
- Contrasting colour to fascias and door frame trims
- Pale colour to all internal cladding
- Double hinged doors with key locking sliding bolts top and bottom
- 4 clever removable gravity locking bike racks
- Vertical, horizontal and diagonal door framing
- Cladding sheets are corrugated and ribbed for extra strength
- Corner cladding sheets are folded ninety degrees and overlapped to provide a strong and waterproof corner joint
- Door threshold
- Foundation rails
- Corner brackets
- External roof size approximately 6'6" deep x 6'8" wide (1980mm x 2030mm)
- External cladding size approximately 6'2" deep x 6'2" wide (1890mm x 1890mm)
- Overall height of the back approximately 5'2" (1570mm)
- Overall height of the front approximately 4'8" (1420mm)
- Overall weight: 71kg excluding floor - heavier than similar metal sheds supplied by others

GALVANIZED STEEL CLADDING: These great value buildings are made with galvanized steel throughout. All framing and cladding is hot dip galvanized steel. This is a process by which steel is coated with zinc to protect it

heavier than most similar metal buildings which is why we publish the weight. The packs are very heavy but surprisingly compact, especially the cladding sheets which are packed tightly together.

SIZES - DEPTH AND WIDTH: The sizes are listed alongside the price. The first dimension listed is the depth and the second dimension is the width. The depth refers to the sloping wall. The sizes listed alongside the prices are the external roof sizes. The external wall sizes may be smaller.
