APPENDICES

- A. Proposed Site Layout
- B. Proposed Site Access Arrangement
- C. Swept Path Analysis
- D. TRICS Output File
- E. NOTIS Output File
- F. PIC Records

1. INTRODUCTION

1.1 Background

- 1.1.1 The site is located at Barrington Road, Northumberland, see Figure 1.
- 1.1.2 The proposed development is for 12 dwellings with an associated access road, see Appendix A.
- 1.1.3 The 12 dwellings are comprised of 8no. 4-bed and 4no. 3-bed dwellings.

1.2 Commission

- 1.2.1 Although the development does not warrant a formal transport statement/assessment to accompany the planning application, the purpose of this report is to provide a technical note to outline the approach adopted to the highways issues associated with the proposed development.

2. EXISTING SITUATION

2.1 Existing Site

- 2.1.1 The site fronts onto the north side of Barrington Road which provides a route between Choppington and Bedlington. The location of the site is shown in Figure 1.

Figure 1: Site Location Plan

- 2.1.2 The site lies to the south of Hancock G & T car breaker yard which is served from a priority T-junction adjacent to its eastern site boundary. The access also serves Watson's Haulage and Skip Hire, Tollbar House and R Binks Auto Parts Store.
- 2.1.3 There is a priority T-junction adjacent to the western site boundary that serves a small number of residential dwellings.
- 2.1.4 The site benefited from an outline planning consent for 5 detached dwellings under planning reference 10/S/00019/OUT in April 2012 and therefore the principle of the site accommodating residential development has been established.

2.2 Site Accessibility

- 2.2.1 There is continuous footway along the north side of Barrington Road and on Red Row Drive which are the nearest roads surrounding the site.
- 2.2.2 There is no dedicated cycling infrastructure in the vicinity of the site but the National Cycle Route (NCR1) can be accessed within Bedlington from St.Johns Road and Palace Road using on-road links. The NCR provides access to local destinations such as West Sleekburn, Ashington, North Seaton and Blyth.

- 2.2.3 There are existing bus stops on Barrington Road which are approximately 750m from the centre of the site can be accessed via the existing pedestrian infrastructure on Barrington Road. The bus stops are served by the 448 Go North East service that provides travel to Guide Post, Stakeford, Choppington and Bedlington.

3. PROPOSED DEVELOPMENT

3.1 Introduction

- 3.1.1 The proposed development consists of the erection of 12 dwellings with an associated access road.
- 3.1.2 The 12 dwellings are comprised of 8no. 4-bed and 4no. 3-bed dwellings.

3.2 Site Access

- 3.2.1 The proposed development will be served from a single vehicular access onto the north side of the C404 Barrington Road. The access will be in the form of a priority T-junction with 6m kerb radii to facilitate a 5.5m wide access road. The layout of the proposed site access arrangement is shown in Appendix B.
- 3.2.2 The site access arrangements will provide visibility splays of 2.4m x 43m, as requested by NCC, wholly within land controlled by the applicant and/or the adopted public highway.
- 3.2.3 The existing footway along the site frontage on the north side of Barrington Road is to be upgraded to 2.0m width as part of the development proposals.
- 3.2.4 The proposed site access arrangement will be subject to a Stage 1 Road Safety Audit (RSA) in accordance with NCC protocols.

3.3 Onsite Layout

- 3.3.1 Refuse bin stores are to be provided within the boundary of each plot.
- 3.3.2 A vehicle swept path analysis drawing is included at Appendix C which demonstrates that an 11.6m long refuse vehicle can enter the site, manoeuvre and egress the site in a forward gear.
- 3.3.3 Footway of 2.0m width is to be provided within the site.
- 3.3.4 The proposed onsite highway infrastructure including carriageway width, footway width and corner radii meet the minimum requirements in accordance with the NCC design standards. However, it is proposed that the onsite highway infrastructure is to be privately maintained and will be serviced by a private refuse collection.
- 3.3.5 Alternatively, the applicant will obtain a letter of acceptance from NCC Neighbourhood Services as to the collection of refuse from the site whilst indemnifying any potential damage caused by the refuse vehicle.

3.4 Parking

- 3.4.1 The parking provision has been provided in accordance with the parking standards contained within the Draft Northumberland Local Plan¹.
- 3.4.2 The schedule of accommodation is listed in Table 3.1.
- 3.4.3 The Architect has confirmed the internal garage dimensions are at least 6.0m x 3.0m, therefore they can be classified as parking spaces.
- 3.4.4 Also, the driveways are positioned to the side of the garages and have been confirmed to be at least 2.5m x 5.0m and therefore do not need clearances associated with garage doors.

Table 3.1 Total Parking Provision				
Parking Provision (Inc. Garage)			Northumberland County Council Parking Standards	
Plot No.	No. of Beds	No. of in-curtilage parking (inc. Garage)	NCC Minimum Standard (inc. Garage)	NCC Minimum Visitor Parking
1	4	3	3	1
2	3	2	2	
3	3	2	2	
4	3	2	2	
5	3	2	2	1
6	4	3	3	
7	4	3	3	
8	4	3	3	
9	4	3	3	1
10	4	3	3	
11	4	3	3	
12	4	3	3	

- 3.4.5 The visitor parking provision is to also be provided in accordance with the guidance which requires 1 space per 4 units and therefore 3 visitor parking spaces are required.
- 3.4.6 It is proposed that double yellow line parking restrictions are provided along the north side of Barrington Road to discourage any indiscriminate on-street parking. This is to be subject to the standard TRO process.
- 3.4.7 Cycle storage is provided within the shed of each plot.

¹ Northumberland Local Plan: Publication Draft Plan (Regulation 19): January 2019. It is noted that at the time of writing, the Planning Inspectorate has found the draft plan to be sound (with the recommended main modifications) and that it is to be discussed at meetings of Cabinet and then the Full Council at the end of March before it can be adopted.

3.5 Trip Generation, Distribution and Assignment

- 3.5.1 Vehicular trip rates for residential sites have been derived from the TRICS database using surveys from the '03- Residential: A-Houses Privately Owned' category. Trip rates for the traditional weekday AM (08:00-09:00) and PM (17:00-18:00) peak hours have been obtained.
- 3.5.2 The average vehicle trip rates for the proposed development during the weekday AM and PM peak hours are set out in Table 3.2, along with the resulting vehicle trip generation. The full TRICS outputs are attached to this report at Appendix D.

Table 3.2 Proposed Development: Predicted Vehicle Trip Generation (12 Dwellings)							
	Unit	Weekday AM Peak Hour (08:00-09:00)			Weekday PM Peak Hour (17:00-18:00)		
		Arr.	Dep.	Total	Arr.	Dep.	Total
Trip Rate per dwelling	Veh/Unit	0.176	0.352	0.528	0.340	0.176	0.516
Trip Generation	Vehicles	2	4	6	4	2	6

- 3.5.3 Table 3.2 indicates the development is forecast to generate 6 two-way vehicle trips during the weekday AM peak hour and 6 two-way vehicle trips during the weekday PM peak hour.
- 3.5.4 A run of the National Online Transport Information System (NOTIS) software program, has been undertaken to calculate the distribution of development trips based on Census 2011 Nomis Journey to Work by car data for the origin of all workers who work within the Northumberland 017 Middle Layer Super Output layer (MSOA), the area in which the site lies. The NOTIS output file is attached at Appendix E.
- 3.5.5 The predicted trip distribution indicates that 55% of trips will travel to/from Barrington Road East and 45% will travel to/from Barrington Road West. The trip distribution, applied to the trip generation (from Table 3.2) is 3 two-way trips to/from Barrington Road East and 3 two-way trips to/from Barrington Road West; see Figure 2.

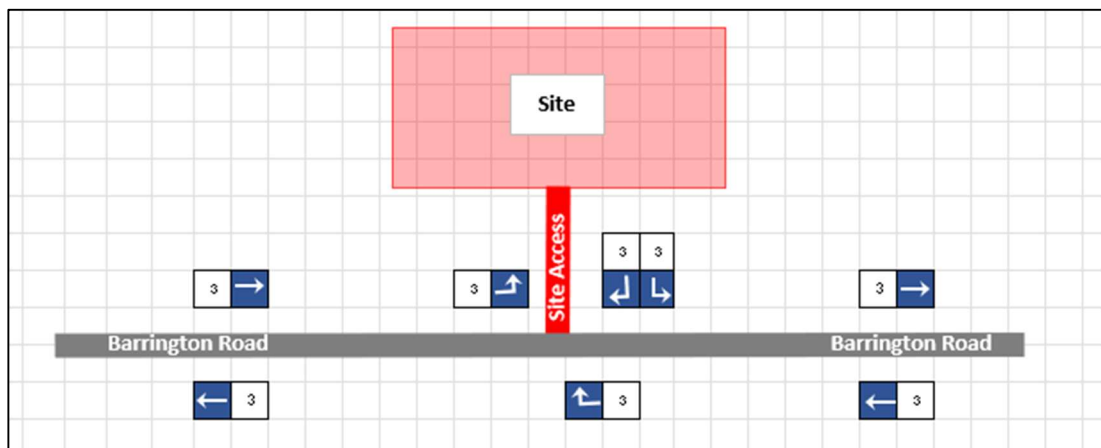

Figure 2: Proposed Trip Assignment

- 3.5.6 An Automatic Traffic Counter (ATC) was installed on the C404 Barrington Road in the vicinity of the proposed access location on Monday 10th January 2022 for one week. It should be noted that this survey period was at a time when COVID-19 restrictions were still in force and therefore it is likely that the flow volumes on the C404 were understated. The survey established average weekday peak hour flows of 300 two-way trips in the 08:00-09:00 AM peak hour and 243 two-way trips in the 17:00-18:00 PM peak hour.
- 3.5.7 The proposed development trips represent an increase of 2.0% in the AM peak hour and 2.5% in the PM peak hour. In operational terms, the percentage increases in trips on the C404 Barrington Road are not significant and are considered to be within the reasonable daily flow variation.

3.6 Road Safety/PIC Assessment

- 3.6.1 Road injury collision data has been obtained from the Capita Innovations Road Traffic Accident System (CIRTAS) for the most recent five-year period (from 1st March 2017 to 1st March 2022). The output file is attached at Appendix F.
- 3.6.2 Figure 3 shows the extent of the highway safety study area and the locations of any reported road injury collisions during the five-year study period.

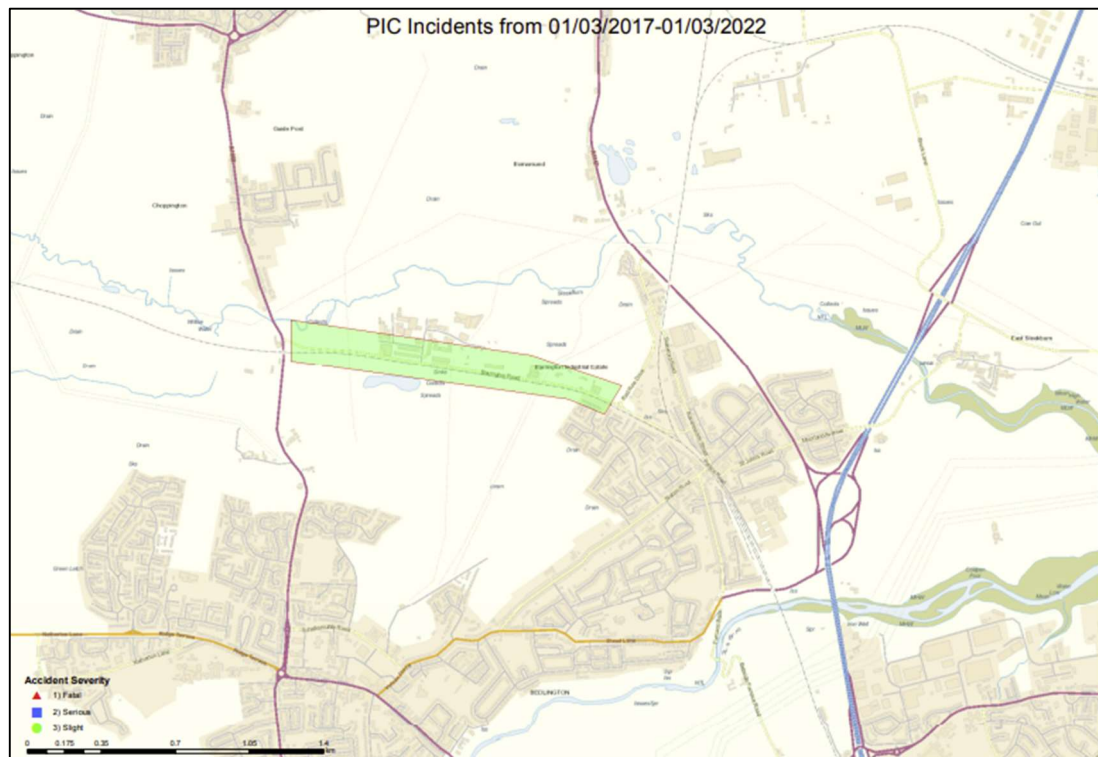

Figure 3: Location of PICs

- 3.6.3 Figure 3 indicates there have been no reported Personal Injury Collisions (PICs) on the C404 Barrington Road during the most recent 5 year period.

- 3.6.4 The PIC records show that there are no inherent highway safety issues on the section of the C404, Barrington Road within the study area. Given the predicted level of additional trips added to the network it is considered that there will be no adverse material impact on road safety associated with the proposed development.

4. SUMMARY AND CONCLUSION

4.1 Summary

- 4.1.1 The purpose of this report is to provide a technical note to outline the approach adopted to the highways issues associated with the development of 12 dwellings a mix of 8no. 4-bed dwellings and 4no. 3-bed dwellings.
- 4.1.2 The site benefited from an outline planning consent for 5 detached dwellings under planning reference 10/S/00019/OUT in April 2012 and therefore the principle of the site accommodating residential development has been established.
- 4.1.3 There is existing, continuous footway in the vicinity of the site and connections are available to the nearest bus stops.
- 4.1.4 The proposed development will be served from a single vehicular access onto the north side of the C404 Barrington Road. The access will be in the form of a priority T-junction with 6m kerb radii to facilitate a 5.5m wide access road.
- 4.1.5 Visibility splays of 2.4m x 43m, as advised by NCC, are to be provided within land owned by the applicant or the public highway.
- 4.1.6 The parking provision has been provided in accordance with the parking standards contained within the Draft Northumberland Local Plan (2019). It is proposed that double yellow line parking restrictions are provided along the north side of Barrington Road to discourage any indiscriminate on-street parking. This is to be subject to the standard TRO process.
- 4.1.7 The proposed development is predicted to generate 6 trips in the AM and PM peak hours, an increase of 2.0% in the AM peak hour and 2.5% in the PM peak hour compared to the flows recorded on the C404 Barrington Road in January 2022. In operational terms, the percentage increases in trips on the C404 Barrington Road are not significant and are considered to be within the reasonable daily flow variation.
- 4.1.8 There are no inherent highway safety concerns on the C404 Barrington Road within the study area that will be adversely and materially affected by the proposed development.

4.2 Conclusion

- 4.2.1 Paragraph 111 of the NPPF states that development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe. In this case, the proposed development will result in no unacceptable or severe impacts and, as such, there is no justification for refusing this planning application on highways grounds.

4.2.2 Considering all of the above, it is concluded that the proposed development is acceptable and should be supported from a highways and transport perspective.

APPENDICES

Appendix A

Proposed Site Plan
1 : 200

Notes:

- This drawing is subject to copyright laws and the use of this drawing is licensed by GFW for use on this project only.
- In the event of any discrepancies being found these are to be brought to the attention of GFW architectural team prior to commencement of works.
- This drawing is to be used solely for the information titled.
- Construction staff and operatives must ensure the main contractor has provided accurate information on all H&S aspects relating to the designs identified on the drawing, including review of designers / contractors risk assessments, method statements, permits to work and pre construction information.
- The proposed layouts are subject to the following, although not exhaustive:
 - Structural and Drainage Engineers requirements.
 - Mechanical and Electrical Engineers requirements.
 - Planning, Listed Building and Building Control approvals as appropriate.
- Use only written dimensions for constructional purposes. Any discrepancies to be reported to the project manager prior to commencement of works.
- Where proposed layouts are based on third party survey information. The accuracy is not underwritten by GFW.

Appendix D

TRIP RATE CALCULATION SELECTION PARAMETERS:

Land Use : 03 - RESIDENTIAL
 Category : A - HOUSES PRIVATELY OWNED
 TOTAL VEHICLES

Selected regions and areas:

02	SOUTH EAST	
	HF HERTFORDSHIRE	1 days
	KC KENT	1 days
04	EAST ANGLIA	
	NF NORFOLK	2 days
	SF SUFFOLK	1 days
06	WEST MIDLANDS	
	SH SHROPSHIRE	1 days
	WK WARWICKSHIRE	1 days
07	YORKSHIRE & NORTH LINCOLNSHIRE	
	NY NORTH YORKSHIRE	1 days
08	NORTH WEST	
	CH CHESHIRE	1 days
10	WALES	
	VG VALE OF GLAMORGAN	1 days

This section displays the number of survey days per TRICS® sub-region in the selected set

Primary Filtering selection:

This data displays the chosen trip rate parameter and its selected range. Only sites that fall within the parameter range are included in the trip rate calculation.

Parameter: No of Dwellings
 Actual Range: 8 to 24 (units:)
 Range Selected by User: 5 to 25 (units:)

Parking Spaces Range: All Surveys Included

Parking Spaces per Dwelling Range: All Surveys Included

Bedrooms per Dwelling Range: All Surveys Included

Percentage of dwellings privately owned: All Surveys Included

Public Transport Provision:

Selection by: Include all surveys

Date Range: 01/01/13 to 16/06/21

This data displays the range of survey dates selected. Only surveys that were conducted within this date range are included in the trip rate calculation.

Selected survey days:

Monday	2 days
Tuesday	1 days
Wednesday	5 days
Thursday	2 days

This data displays the number of selected surveys by day of the week.

Selected survey types:

Manual count	9 days
Directional ATC Count	1 days

This data displays the number of manual classified surveys and the number of unclassified ATC surveys, the total adding up to the overall number of surveys in the selected set. Manual surveys are undertaken using staff, whilst ATC surveys are undertaken using machines.

Selected Locations:

Edge of Town	10
--------------	----

This data displays the number of surveys per main location category within the selected set. The main location categories consist of Free Standing, Edge of Town, Suburban Area, Neighbourhood Centre, Edge of Town Centre, Town Centre and Not Known.

Selected Location Sub Categories:

Residential Zone	10
------------------	----

This data displays the number of surveys per location sub-category within the selected set. The location sub-categories consist of Commercial Zone, Industrial Zone, Development Zone, Residential Zone, Retail Zone, Built-Up Zone, Village, Out of Town, High Street and No Sub Category.

Secondary Filtering selection:

Use Class:

C3 10 days

This data displays the number of surveys per Use Class classification within the selected set. The Use Classes Order 2005 has been used for this purpose, which can be found within the Library module of TRICS@.

Population within 500m Range:

All Surveys Included

Population within 1 mile:

1,001 to 5,000	2 days
5,001 to 10,000	1 days
10,001 to 15,000	5 days
15,001 to 20,000	1 days
20,001 to 25,000	1 days

This data displays the number of selected surveys within stated 1-mile radii of population.

Population within 5 miles:

5,001 to 25,000	2 days
25,001 to 50,000	2 days
50,001 to 75,000	1 days
75,001 to 100,000	2 days
125,001 to 250,000	2 days
250,001 to 500,000	1 days

This data displays the number of selected surveys within stated 5-mile radii of population.

Car ownership within 5 miles:

0.6 to 1.0	4 days
1.1 to 1.5	6 days

This data displays the number of selected surveys within stated ranges of average cars owned per residential dwelling, within a radius of 5-miles of selected survey sites.

Travel Plan:

Yes	2 days
No	8 days

This data displays the number of surveys within the selected set that were undertaken at sites with Travel Plans in place, and the number of surveys that were undertaken at sites without Travel Plans.

PTAL Rating:

No PTAL Present 10 days

This data displays the number of selected surveys with PTAL Ratings.

Covid-19 Restrictions	Yes	At least one survey within the selected data set was undertaken at a time of Covid-19 restrictions
-----------------------	-----	--

22:00 - 23:00									
23:00 - 24:00									
Total Rates:			2.358			2.446			4.804

This section displays the trip rate results based on the selected set of surveys and the selected count type (shown just above the table). It is split by three main columns, representing arrivals trips, departures trips, and total trips (arrivals plus departures). Within each of these main columns are three sub-columns. These display the number of survey days where count data is included (per time period), the average value of the selected trip rate calculation parameter (per time period), and the trip rate result (per time period). Total trip rates (the sum of the column) are also displayed at the foot of the table.

To obtain a trip rate, the average (mean) trip rate parameter value (TRP) is first calculated for all selected survey days that have count data available for the stated time period. The average (mean) number of arrivals, departures or totals (whichever applies) is also calculated (COUNT) for all selected survey days that have count data available for the stated time period. Then, the average count is divided by the average trip rate parameter value, and multiplied by the stated calculation factor (shown just above the table and abbreviated here as FACT). So, the method is: $COUNT/TRP*FACT$. Trip rates are then rounded to 3 decimal places.

The survey data, graphs and all associated supporting information, contained within the TRICS Database are published by TRICS Consortium Limited ("the Company") and the Company claims copyright and database rights in this published work. The Company authorises those who possess a current TRICS licence to access the TRICS Database and copy the data contained within the TRICS Database for the licence holders' use only. Parameter summary

Trip rate parameter range selected:	8 - 24 (units:)
Survey date range:	01/01/13 - 16/06/21
Number of weekdays (Monday-Friday):	10
Number of Saturdays:	0
Number of Sundays:	0
Surveys automatically removed from selection:	0
Surveys manually removed from selection:	0

This section displays a quick summary of some of the data filtering selections made by the TRICS® user. The trip rate calculation parameter range of all selected surveys is displayed first, followed by the range of minimum and maximum survey dates selected by the user. Then, the total number of selected weekdays and weekend days in the selected set of surveys are shown. Finally, the number of survey days that have been manually removed from the selected set outside of the standard filtering procedure are displayed.
