

**Planning application W/22/0953 – redevelopment of existing and covered 23 bay driving range to provide 30 covered driving range bays, together with reception and parking area for range ball collection buggy; and erection of 10 m high golf safety netting = The Warwickshire Golf and Country Club, Warwick Road, Leek Wootton, Warwick, CV35 7QT**

### **Foul Sewerage / Utilities Statement**

The application proposes a single toilet within the new driving range structure. It is intended to connect to the existing mains sewer which runs close to the adjacent Pro Hut.

If this is not possible, the applicants will connect to the existing sewer which serves the clubhouse.

Foul sewerage will therefore be by connection to a public sewer, rather than by a septic tank or other form of private treatment.

If further details regarding the connection to the mains, we trust that this can be required by condition.
