Our ref: BYC4432.Samples

This information has been compiled to discharge conditions 3 of planning approval 21/06669H and Condition 4 of listed building consent 21/06670/LA.

- a) The proposed flat roof material is a single ply membrane with applied standing seam. See Fig. 1

Fig. 1: Single ply membrane

- b) The proposed external wall treatment for the new extension is smooth finish sand cement render to match the existing. Fig. 2 shows the existing render has a fairly smooth finish. See Fig.3 for proposed finish.

Fig. 2 Rear elevation

Fig. 3 Smooth sand cement render

c) The proposed proposed copings to the parapets are cast Bath Stone. See Fig. 4 and 5.
