Hi both,

Not sure how much difference it makes in the grand scheme of things but for accuracy it is actually one multi-stemmed tree with 3 stems.

Regards

Steve

H Steve,

Thanks for passing this on.

Lynne, Can you set up a 5 Day Notice for these three failed trees? I won't look to condition replacement considering the trees are in a woodland setting.

Kind regards,

Tom

Hi both, not quite sure which of you covers the East but please see below email trail for your information and records. The tree is a multi-stemmed mature sycamore that came down over the river and footpath. Pics and location attached.

Kind regards,

Steve

Subject: FW: 3 large trees down at Snuff mills

Hi Beth,

Hope you had a nice holiday.

This one came in last Thursday.

I'm afraid the tree is rooted in the bank on the other side of the river so will need to be recharged. Might be easier said than done.....!

Have we got any idea who owns the land..... ?

I have informed Tom/Matthew for their records as the tree is in a Tree Preservation area.

Just let me if you need any more info.

Good afternoon all,

Just to let you know that I have raised a job to clear the footpath and river at snuff mills where a multi-stemmed sycamore has uprooted.

Steve is aware of the job and is planning to send one of the gangs to carry out the work tomorrow morning. In the meantime the public can easily divert to the top path.

Sally – the job number is 2007421 – 90+ fell

Keith – can you commit it for me please?

Order no: 31306

Many thanks,

Steve

Hi Andy,

Just seen Beth is away and we need urgent tree works. Three large trees have fallen had snuff mills and are blocking the path. They are located by the dog bin just past the Mill on the river path. Please email or give me a call on [07823 546474](tel:07823546474) to confirm you received this message and is being dealt with. Thanks

Kind Regards,

Mary O'Connell
