

## Application for Shed Installation at 2 Hardhill Steading, Hatton, Peterhead

### Notes to Elevation and Floor Plan Drawings

1. Shed will be installed on wooden joists of approximately 100mm in height
2. Shed walls, roof and floor are made up of wooden flat boards of the following thickness:
  - a. Walls: 40mm (tongue and groove)
  - b. Roof: 19mm (flat)
  - c. Floor: 25mm (flat)
3. The shed is of a simple self-build design and does not require anything apart from basic tools to be put together. All materials have already been delivery to site and can be inspected if required.
4. Shed is intended to be used as a tool shed and garden equipment storage, therefore overall design includes for multiple windows to ensure maximised natural lighting and mould-free environment.
5. Included below are two 3D render examples of the shed (no scale).
6. No changes are required and proposed to existing ground level and concrete surfaces
