KRIGER™ GN-10

Industrial fire tube two-way gas boiler with a burner with a capacity of 10 MW.

Gas boilers of the GN series can be used for heating residential and industrial premises, hot water supply systems, wood drying chambers equipped with a continuous heating water system with natural or forced circulation, as well as other technological purposes.

NAME OF THE PARAMETER OR SIZE	VALUE OF THE PARAMETER OR SIZE
Model range	KRIGER™ GN-10
Nominal heating capacity, kW	10000
Range of regulation of boiler heat output, %	30-100
Coefficient of performance, %, min	90
Maximum heat carrier temperature at the boiler outlet, °C	115
Working fluid pressure, MPa, max	0,40; 0,60; 0,80; 1
Flue gas temperature, °C, min	160
Sound level, dB, max	90
DIMENSIONS	
Length	7612
Width	2986
Height	3406
