**Dear Mr Robert Pritchard,**

**Please accept this as my arboriculture report on a large Ash tree situated in the front grounds of the above address. My thoughts are the tree has severe Ash die back on the right hand side in proportion to the upper crown ,the apparent foliage has less density on the said side of the tree as opposed to the opposite side of the upper crown. My reasons to reduce the tree by 50% to regenerate new growth points in the main structure of the tree to form a new crown for the health and longevity of a mature Ash tree. Also for the safety to public areas & property. This is my current conclusion to the situation that this tree poses to Mr Pritchard & the public .**
