

Impact on the Surrounding Street Scene.

The property is an integral part of the village street scene. Carrying out these works will only improve the standing of this property and as such aids its contribution to the collective heritage assets of the village as a whole.

The property stands sideways to the road with only the Road Elevation window and the first floor Front Elevation windows clearly visible the rest being masked by its own adjoining wall and the neighbour's property. However when the works have been undertaken, where the windows are visible it will only impact in a positive way for the village.

It is our opinion that this work will enhance the overall appearance of the property and the comfort of the residents and will ensure its longevity in the future.

The method and materials proposed are sensitive to a building of this status and appearance.
