Aim? Improve aesthetics of front area

① (Holly) L-side Pathway

Remove Low water shoots etc. ("Possibly" remove tree if view of the church entrance is required).

② (Oak.) R-Side pathway.

remove 3-4 lowest branches to clear walkway

allow light and show more of the doorway from the road-pathway. (remove deadwood)

③ (Holly) R-side nearest door.

My recommendation would be to remove this tree!

(Stopping the growth of the beautiful multi-stemmed Yew)
(blocking light and the view of the Yew!!)

Which will recover.

the minimum would be to remove the large unnatural growth.

④ (Holly) twin stem. (almost dead!) remove.

⑤ (Ash) @ front remove small dead branches + One dead stem

⑥ (Oak) leaning by front side

(Sympathetic) removal of a few of the over hanging branches
weight reduction will lift the branch slightly.
(remove deadwood)
