

Application for a Non-Material Amendment

Brook Farm Energy Storage System

Non-Material Amendment to Brook Farm Energy Storage System (DC/19/01601)

Introduction

In reference to the Energy Storage System at Land off Church Hill Road, Anesco Ltd wish to apply for a non-material amendment.

1. Amendment to the fence type.

An amendment to the fence type around the perimeter of the site from deer fence to V-mesh fence. A 2.4m V-mesh fence, coloured green, will surround the site in its entirety. The previously approved palisade fence, around the 132kV substation, will remain in place.

In addition, the V-mesh fence around the transformers, that was previously approved, will be removed. The small number of cables will be caged in order to protect wildlife and personnel.

The reason for the amendment is to increase security on site and protect the equipment.

If you require any further information to accompany this application, please do not hesitate to contact me.

Yours sincerely

Laura Murphy
