

Survey notes

1. All levels relate to a GPS derived datum. Control was established using Ordnance Survey's Active GPS Network OSGB32(36). Translated from ETRS89 using OSGM15 and OSTN15 models.
2. Do not scale from this drawing, if dimensions are not clear ask.
3. This drawing is to be read in conjunction with all other relevant documents relating to the project.
4. Measurements to internal walls are generally taken to the wall finishes at approximately 1.5m above ground level with the wall to be assumed vertical. Due to condition of barn wall widths vary
5. Floor to ceiling heights are generally taken at the centre of the room. In some instances, beam downstands/changes in ceiling profile or similar result in a reduction of ceiling height to that shown.
6. Floor levels vary throughout the building, differing floor buildup has been noted to reflect this.
7. Sill heights and window heights measured internally.
8. Floor plan as current on date of survey - October 2022
