

EMMA AC

Thank you so much. I will be aiming to not work in those hours. I really appreciate your support. I will contact if there is anything that does need to be done outside of those hours. I strongly believe that won't be the case.  
Many thanks,  
Patrick

Good evening,

Many thanks for your recent correspondence highlighting the proposed plans for your build.

I do not have any concerns relating to the build or the proposed drawing you have supplied.

However, I would like reassurance that during the build phase if the application is successful, work shall not take place in unsociable hours Sat / Sunday due to our work shift. We often work Friday nights so would appreciate work to hold off until after 10am if avoidable.

We respect the fact this may not always be possible due to contractors. If this is unavoidable, a warning of early work would be greatly appreciated.

Many thanks again and good luck with your application, I hope it goes well for you.

Jared Ryder.
