Kingston Tree Care & Ground Care

Date 14 11 22

Dear Sir/Madam

Please find enclosed tree application, photographs, and plan for tree work at: 33 The Street Kingston Canterbury Kent CT4 6JE

Front Garden

Large Fir Tree

Growing through the canopy of a Mature Oak Tree, with most of the growth of the Fir Tree is towards The Street Kingston due to light deprivation from the Oak Tree, also the Fir Tree has outgrown its space.

The roots of the Fir Tree are less than 3 metres from the main drain and a recently laid block paving drive.

Recommend: Section dismantle to ground level, to allow the mature Oak Tree to thrive

Replace with a Weeping Copper Beech Tree in a suitable position.

Should you require further information please telephone the above telephone numbers

Yours sincerely
