

- NOTES**
1. Responsibility is not accepted for errors made by others in scaling from this drawing. All construction information should be taken from figured dimensions only.
 2. Any discrepancies are to be reported to the designer.
 3. This drawing is copyright.

GENERAL NOTES

- Do not scale from paper drawings, all dimensions are in metres and measurements should only be based using the original digital information and all critical dimensions should be confirmed prior to any site work. Any discrepancies should be reported immediately.
- Drainage sizes and connections have been established either visually, audibly or by the use of dets and annotated accordingly.
- Trees are drawn to scale on the survey and descriptions should be taken as a guide only.
- For Internal building surveys, all heights are measured from floor level to top of eave and lintel heights are measured from top of eave to underside of window opening. All wall lines are measured approximately one metre above floor level unless obstructed.
- The information provided within this drawing either in paper or digital format is intended for the use of the named client and parties involved in the project only, any passing of the information to a third party must be approved by Reeder Surveys who hold copyright of the survey information.
