

HARPS HOUSE TREE APP 2022/2290/TCA

Further Information responses:

1. Yes I can confirm I am happy to amend the application type.
2. G1 is Horse Chestnut but on further investigation is covered in the pruning works application. This is in the Tree Survey, Arboricultural Impact Assessment and Arboricultural Method Statement Prepared by Ian Monger Trees. So G1 can be taken off this application as already covered in the 2022/2291/TCA application.
3. Please see attached Location Plan of site with the location of the trees.
