

My supporting statement -

I am applying for permission to change the site plan line as buildings numbered 6 and 8 were demolished, and building 9 was dismantled, all occurring some years before I purchased the site.

I have demolished and replaced building 7 with a new building. This has been erected 90 degrees in relation to where the old building stood, to give better access to the yard adjacent to the building. I have also replaced building 9 with a smaller building than the original, with an area of hard standing to the rear of the building. I am seeking permission for these 2 buildings with B2 and E(g) use.

I have included a new plan to show the amended site plan line, and to show the buildings as they are now.

As buildings 6 and 8 have been removed, I would like to change the use from agricultural to B2 and E(g) use for buildings 11 and 12, plus the land to the rear of building 12.
