Survey Control Station Trees are drawn to scale showing the average canopy spread. Descriptions and

All below ground details including drainage, voids and services have been identified from above ground and therefore all details relating to these features including; sizes, depth, description etc will be approximate only. All critical dimensions and connections should be checked and verified prior to starting

Detail, services and features may not have been surveyed if obstructed or not Surveyed physical features may not necessarily represent the legal boundary

Measurements to internal walls are taken to the wall finishes at approx 1m above the floor level and the wall assumed to be vertical. Cill heights are measured as floor to the cill and head heights are measured

The contractor must check and verify all site and building dimensions, levels,

dimensions are in metres unless otherwise stated. The survey control listed is only to be used for topographical surveys at the stated scale. All control must be checked and verified prior to use.
