Scale: Not to scale	Paper Size: A4
	Date of Survey: 16/03/2023

Drawn By:
 Alan J. Kingston PG Cert
 BSc: Arboriculture
 Arboricultural Officer

Tree No.	Species	Recommendations
T1	Common Lime	Crown lift to 5.5 metres over the highway and reduce lower crown, on southwest side, to match upper crown, as indicated in the annotated photograph above. Works required to prevent obstruction of the highway and damage to the overhead BT cables that are running through the crown of the tree. Remove major deadwood above 30mm in diameter to prevent damage to people or property.
T2	Beech	No works at present, although the deadwood could be removed. However, this will be expensive and might not be worth the expenditure at the present time. Please contact the Arboricultural Officer when the fungal fruiting bodies emerge again for formal ID at no extra cost.
