Hello Suzanne,

1. T15

2. We would like to apply for tree's branches reduction - northern aspect - we would like to ask for all the branches being cut off - from the tree trunk to to the top of the tree (from the lower branches to to the highest branches on the northern side). We would like to ask for all the branches which lean out the northern side (to the drive way side - where the cars are parked) to be cutted off from the trunk till the end of the branches. We are not able to specify how many metres it is as the tree is too high.

Kind Regards,
Krzysztof Szarlan
