Lime in Front Garden (T4 - red)

The tree is situated in the front garden of Hopwood. It is approximately 17 metres tall, with a 6-metre canopy spread and an approximate 600mm trunk diameter. This tree is in good condition with no visual signs of defects. However, this tree is producing a large amount of epicormic growth around the base of the tree and a dense canopy. We would recommend this tree is thinned by approximately 20% and is crown raised to approximately 5 metres to allow light under the tree and reduce over-shadowing. We also recommend all epicormic growth is removed.
