Introduction

Barsby Structural Consultants have been appointed by Mr & Mrs Carter to carry out structural calculations and drawings suitable for construction and building regulations approval for 15 Willow Grove, South Cerney.

The scope of works is to design trimming steelwork and timber to support the existing dormer bungalow structure and permit a number of ground floor wall removals and bi-fold openings. In addition, a single storey flat roof extension to be designed to the rear of the existing with corner glazing and steel post (post positions is to be agreed with the Architect).

Designers Risk Assessment

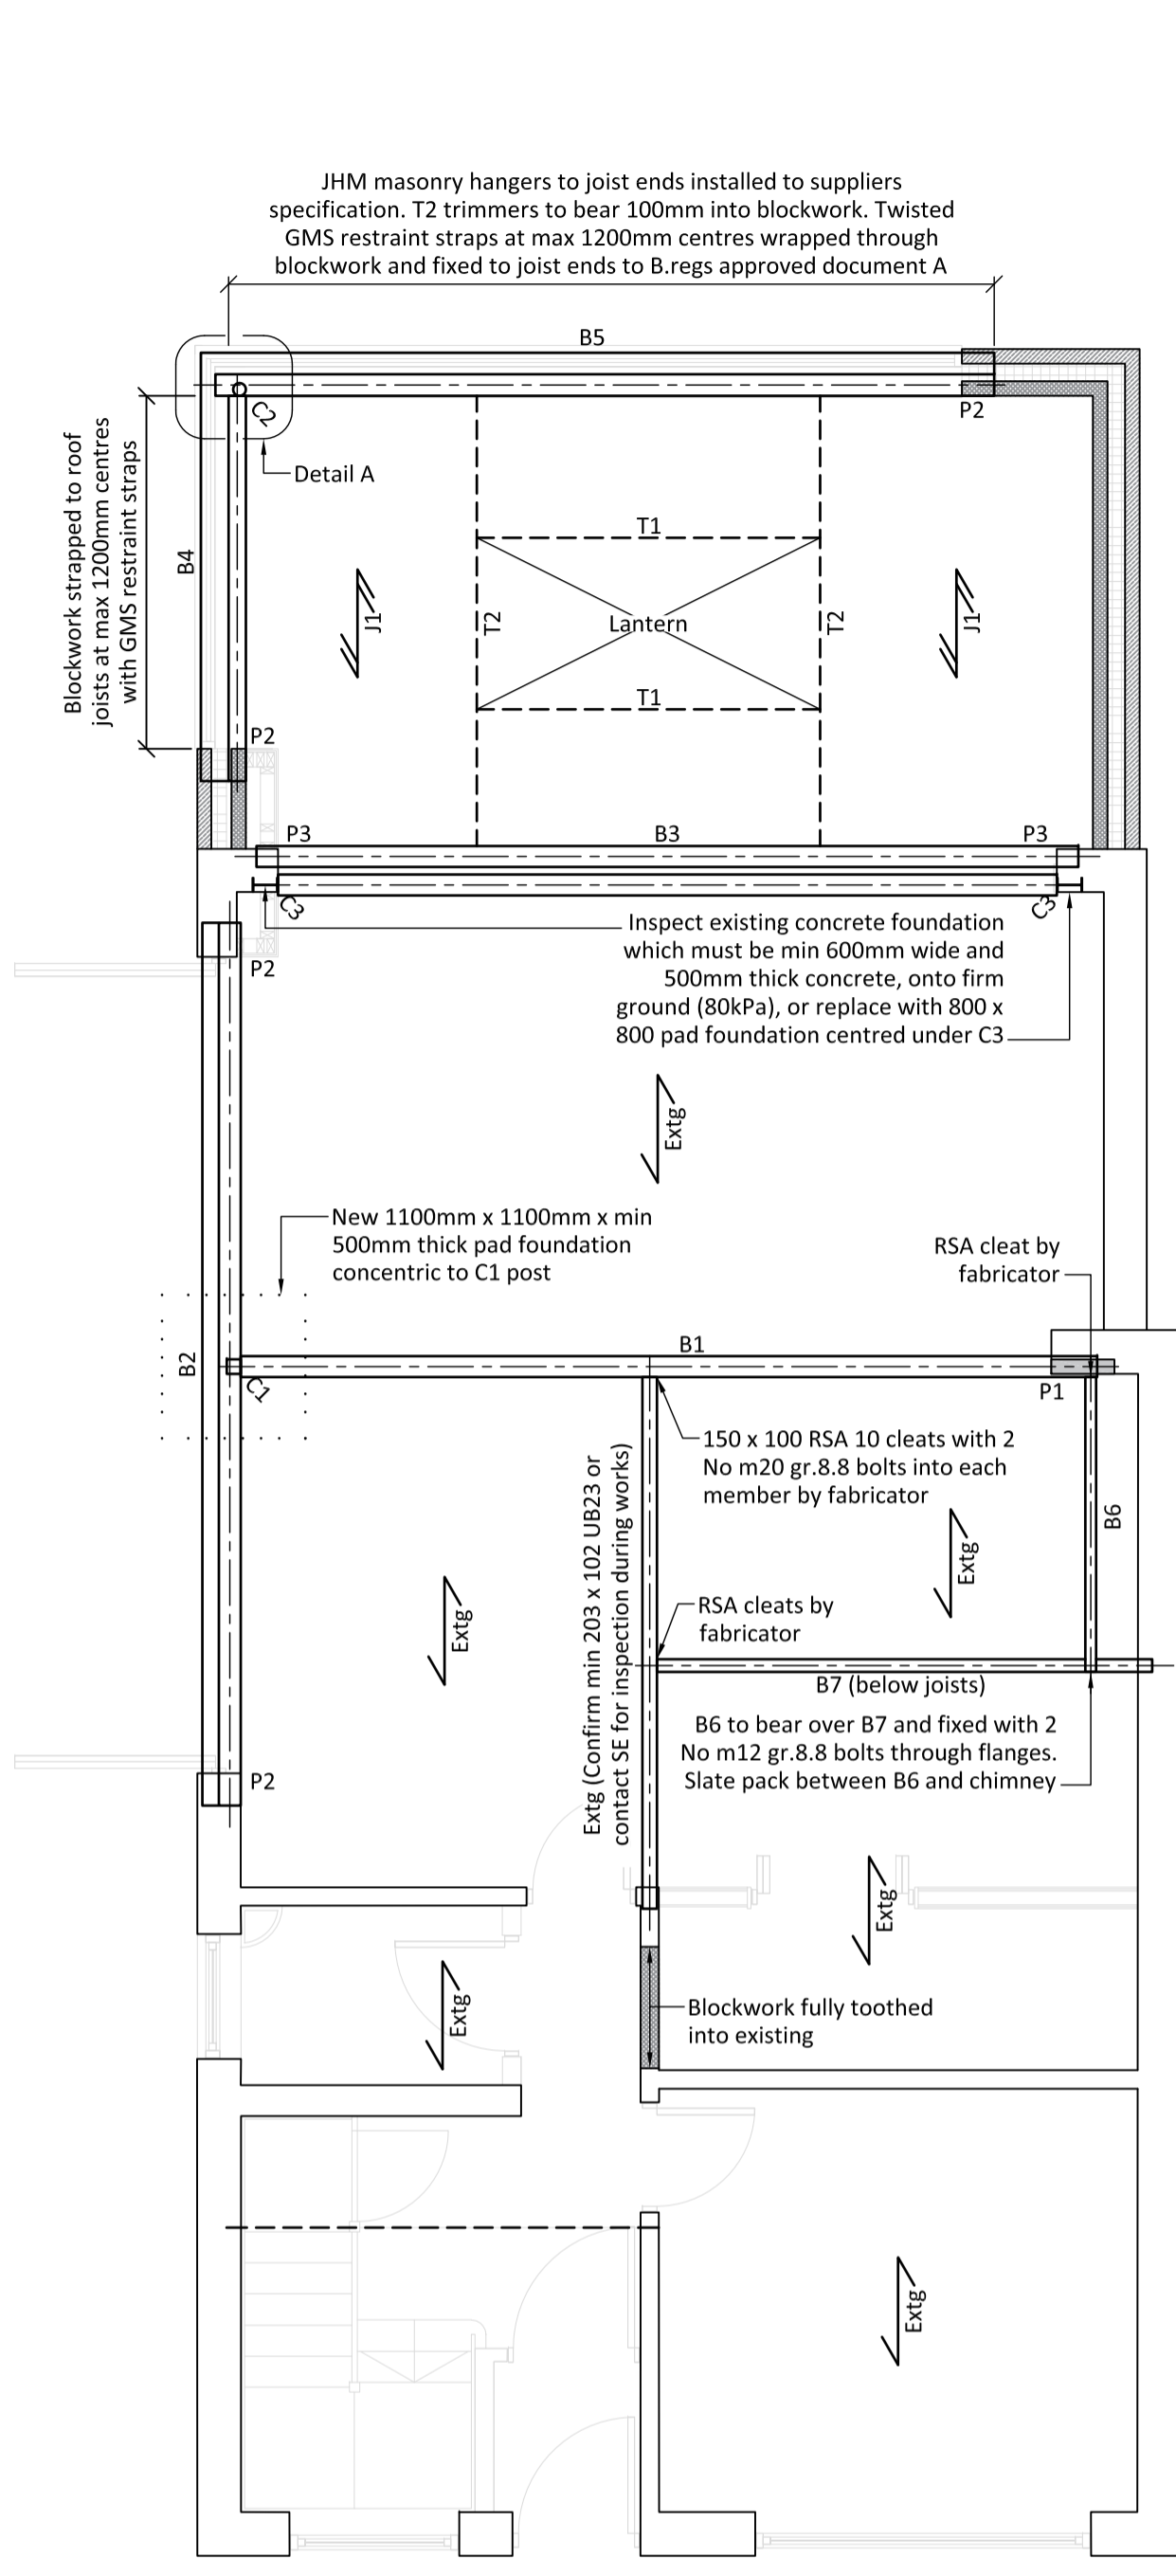

A risk assessment for this project has been carried out in accordance with CDM regulations 2015, to identify unusual hazards associated with the design; those are risks that are not standard risks associated with construction projects. Standard construction risks are not assessed, as Barsby Structural Consultants Ltd assumes a competent contractor is appointed to carry out the works. The Unusual risks have been assessed for severity and probability, and mitigating measures are described in the measures taken column. Where residual risks are greater than a low rating, these are highlighted on the project drawings.
