## Description of the Proposal

Please note in regard to:

- **Fire Statements** - From 1 August 2021, planning applications for buildings of over 18 metres (or 7 stories) tall containing more than one dwelling will require a 'Fire Statement' for the application to be considered valid. There are some exemptions. [View government planning guidance on fire statements](#) or [access the fire statement template and guidance](#).
- **Permission In Principle** - If you are applying for Technical Details Consent on a site that has been granted Permission In Principle, please include the relevant details in the description below.
- **Public Service Infrastructure** - From 1 August 2021, applications for certain public service infrastructure developments will be eligible for faster determination timeframes. See help for further details or [view government planning guidance on determination periods](#).

### Description

Please describe details of the proposed development or works including any change of use

The works comprise a strip off to the existing flat roof covering with removal of roof lights, followed by installation of new roof coverings and roof lights into original positions.

The existing flat roofs comprise a mineral felt covering, built up with 30mm polystyrene, 20mm fiberboard, 25mm rock asphalt upon the roof deck. Roof 1b as referred to in the roof plan in the attached report, has been repaired with an additional liquid coating.

The proposed flat roof covering to both roof 1a and 1b is to follow a similar fashion and not too dissimilar in nature to the existing makeup, with some minor differences in the materials below the covering, to aid compliance with up to date regulations and standards i.e. new warm roof construction to be introduced including new insulation, vapor barrier and felt covering. The height to the roof will be increased slightly, approximately 130mm, and an additional 50mm where upstands are. Detail can be found in associated manufacturers documents.

These works do not stipulate a change of use in any form.

Has the work or change of use already started?

Yes

No

## Existing Use

Please describe the current use of the site

The site is operated as a Primary School, with adults and children occupying the site at various times during the day.

**Existing materials and finishes:**

Roof 1a – 30mm polystyrene, 20mm fibreboard, 25mm rock asphalt, 2 layer felt Roof 1b – 30mm polystyrene, 20mm fibreboard, 25mm rock asphalt, 2 layer felt with additional liquid coating repair

**Proposed materials and finishes:**

Roof 1a - this roof area is proposed to be overlaid with a new insulated waterproofing system, per the Eurorood Mono Olivine high-performance waterproofing system. New upstands and flashings will be formed throughout and replacement of most, if not all ancillaries. New insulation to be installed will increase the roof height slightly by approximately 130mm, and where upstands are present, these will be increased by 50mm in height. This is to achieve current regulations. Roof 1b - Repair of the exposed substrate to provide an acceptable base, apply a primer coat and overlaying with a new insulated waterproofing system. New upstands and flashings will be formed throughout and replacement of most, if not all ancillaries. the specification to be installed is Alumasc's Eurorood Mono Olivine high-performance waterproofing solution. New insulation to be installed will increase the roof height slightly by approximately 130mm, and where upstands are present, these will be increased by 50mm in height. This is to achieve current regulations.

**Type:**
