

Hard Landscaping Key

- Concrete hardstanding
- Loose Laid gravel
Colour - South Cerney or Cotswold
Gravel to be laid on stabilisation grid
Stone/ concrete edging to gravel
Gravel to be raked and spot weeded as required.
- Patio Tiles

Soft Landscaping Key

- Shrub and herbaceous planting
All perennials to be planted as 9cm pots.
Proposed Species to include a selection of flowering perennials
- Preparing of beds will be conducted using organic principals.
No chemicals are to be used to remove weeds or migrant grass. Imported soil and compost will be kept to a minimum and peat free. If required a shredded bark mulch layer of 75mm will be used to suppress future weeds. After planting all perennials to be well watered until established. Watering to be conducted daily during any dry spells in the growing period from April to September
- Lawn grass - Lawn grass seed mix
- Ground to be cleared of all stones, debris and weeds.
Area to be dug over and top soil or top soil improver added in along with sharp sand to prevent water logging. Soil to be firmed down and all lumps removed. Seeds to be sown between April to September and new seeds to be thoroughly watered and fertilised with starter feed to establish lawn.
- Meadow grass
- Existing meadow grass to be maintained and infill added where required. Where new grass to be planted ground to be cleared of all stones, debris and weeds. Area to be dug over and top soil or top soil improver added in along with sharp sand to prevent water logging. Soil to be firmed down and all lumps removed. Seeds to be sown between April to September and new seeds to be thoroughly watered and fertilised with starter feed to establish.
