Dear Mr Isbell,

Thank you for your letter offering guidance and help with the application for siting a new storage container adjacent to the existing old one that appears to have never had planning permission when it was first installed back when the pavilion was built in the 1980's.

I can't claim to have had a sudden learning curve on the drawing of plans on the computer, but I have been able to tap into some friendly expertise. I hope what I have attached with this letter provides the detail requested and that we can proceed with the installation of the container whilst ground conditions are hard for the machinery required.

It is indeed helpful that you have indicated this application can also cover the legality of the old container so that is much appreciated. Please let me know if I have fallen short in any aspect of the required detail.

Yours sincerely

Ian W Campbell MBE  
Treasurer
