Contaminated Land

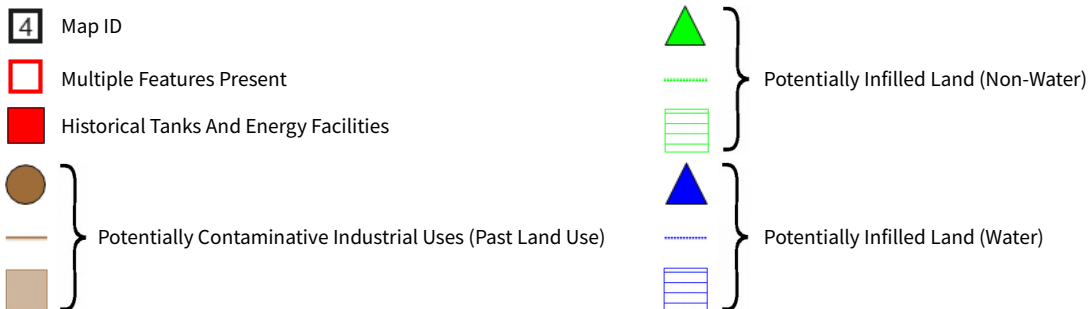

Section 1a: Historical Land Uses

This section describes historical activity at and around the property, which could be considered to be contaminative. The information is taken from a variety of sources including Landmark's extensive historical map collection and analysis of historic activity. Records are highlighted due to the potential for contamination to exist.

Section 1b: Incidents and Enforcements

The data within this section tells you whether your property or surrounding area has been identified by the Local Authority as “Contaminated Land” under Part 2A of the Environmental Protection Act 1990 or if there have been any other pollution incidents, prosecutions or enforcements. Should there be an indication of contamination, it is not necessarily a cause for concern. Your report will be assessed by our professional environmental consultants who will advise you what, if any, considerations need to be made should you proceed with the property purchase.

Section 1c: Landfill and Waste Sites

The information in this section identifies active and historical landfill and waste sites within 250 metres of the property. Having a landfill or waste site near your property does not necessarily mean that you or the property will be affected. However, it is something you need to be aware of, because landfill and waste can have a detrimental effect on the surrounding environment, property value and health. A closed landfill/waste site should be given equal consideration to an active site, because of landfill by-products. For instance, landfill with lots of organic material can continue to produce odours and gas for many years.

Contaminated Land

Section 1d: Authorised Industrial Processes

This section describes current and licensed activities within 250 metres of the property, which have the potential to cause contamination or have an impact on the environment. The licensed activities could range from pollution to air, land or water; or storage of hazardous or explosive materials. Licences may no longer be active, but the nature of the past activity means it could still have an impact.
