RE: APPLICATION FOR DISCHARGE OF CONDITIONS – DC/23/02844

Dear Sir/Madam,

Thank you for your prompt response in regards to our recent submission to discharge conditions 22 and 23.

I can confirm our drawings now show the locations of fire hydrants marked as 'FG'. Please see attached WM0023620-1_1_of_1 hydrant PDF.

I have also attached a site layout showing the proposed delivery of the broadband to site along with a statement which confirms the use of full fibre gigabit, which is capable of 'ultrafast speeds of up to 1Gbps'.

External Sender: This message originated outside of Keepmoat Homes. Please treat attachments and links with caution.

Afternoon Damian

I can confirm that all infrastructure supplied by Openreach to sites with 20 or more plots since 2016 has been full fibre gigabit capable infrastructure.

I will chase our legal team to see if we have a formal response but hopefully this e-mail will suffice.

Look forward to catching up soon.

Best

Bryan

We've installed Full Fibre broadband to future-proof your new home. It's capable of ultrafast speeds of up to 1Gbps so everyone in your home could use high speed broadband, all at the same time.

Fast speeds – always

Your home has a direct fibre link running all the way from your local telephone exchange, meaning you will have reliable and constant speeds no matter how far the data has to travel. Depending on the package you purchase from your communications provider, our fibre is capable of carrying massive amounts of information as pulses of light and that's why ultrafast broadband is so fast.

Phone service

Your fibre broadband can carry your phone calls via your communications

Ultrafast broadband

Get access to high speed internet, for video calling, home working, in fact all your

Media & Movies

Stream 4K movies to your TV, watch catch-up services, like BBC iPlayer and access

Should you have any queries regarding the above, please let me know.

Kind regards,
Dilek
