#### Description

Please describe details of the proposed development or works including any change of use

To change a section of unused land-locked agricultural land into domestic garden use to improve biodiversty. The proposed garden area will have an alder hedge separating it from the agricultural land which will attract birds and insects.

Alistair Griffiths, Royal Horticultural Society director of science and collections, states "With the climate crisis we support plant-friendly gardening practices that work with both cultivated and wild nature for the benefit of plants, people and the planet. RHS believes the greater diversity of plants both cultivated and wild you have in your garden, the better the overall impact for climate, resilience, wildlife and people." This is what we are aiming to achieve within the scope of the application.
