Dyrham Park main house roof space works

Dear David,

I'm writing to inform you about the results/ conclusions of the daytime meeting to look at the minor works to the West Range roof spaces at Dyrham Park carried out by both of us on 28th January 2022.

No bats were seen in the roof spaces signs (as in previous years) suggest small no's/individual bats visiting, small no's of Pipistrelle bat droppings were seen.

FIREDOOR REPLACEMENT OF EXISTING FIREDOORS

Go ahead by end of April 2022 or November – April another year, no ECW or other requirements.

INSTALLATION OF NEW FIREDOOR

This will potentially obstruct a bat flight route between roof spaces. Works do not require a licence but does require a substantial intumescent above the door to allow bats access, plus a licensed bat handler should attend during start of these works. Carry out by end of April 2022 or November – April another year.

INSTALLATION OF SPOT LIGHTS INTO SINGLE EAVES CEILING

No evidence of bats using this area, works do not require a licence carry out by end of April 2022 or November – April another year, no ECW or other requirements.

Yours sincerely,

Geoff Billington
