Apologies for the delay in responding, I have a similar proposal elsewhere in the district and wanted to make sure I offered the same advice. Any revised scheme would need to demonstrate that a conversion could still be implemented, such as an updated structural survey, and highlight the reasons why a rebuild is now considered a preferable solution.
With regard to the physical alterations to the built form, I would remind you that the site is sensitively located within an AONB and the increase in height could be construed as more intrusive in the landscape setting. I would be nervous about agreeing an extension to the footprint of one of the dwellings. However, if you feel that you can justify this in policy terms, it can be considered should you progress to an application.
Authority Employee/Member
With respect to the Authority, is the applicant and/or agent one of the following: (a) a member of staff (b) an elected member (c) related to a member of staff (d) related to an elected member
It is an important principle of decision-making that the process is open and transparent.
For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.
