

13. In regards the plumbing works and the other conversion works I confirm that I did this myself.
-
14. I did not have any intention of breaching any planning law, but I did convert part of the building as per the survey drawing with the intention of living in it myself in due course, as my own accommodation, because where I live is not easy for an aged person due to the stairs being extremely narrow and steep. There are no toilet facilities upstairs, and due to my previous bowel condition, I have to sleep downstairs to so that I can access a toilet easily.
-
15. I confirm that none of the work done was conducted surreptitiously and was not intended to be so. Many people knew I was doing it at the time, and this is evidenced by other persons' witness statements.
-

I make this Witness Statement and Declaration under the provisions of the Statutory Declarations Act 1835 and I solemnly declare that I have made the above declarations conscientiously and solemnly believing them to be true.

Printed Name: RONALD JAMES HAYDON

Declared & Signed:
