

2159 Cross Street, Eye

Approved Planning Permission Ref. DC/21/03629

Application for Discharge of Condition no. 6

Details of External Facing Render

The building will have an external wall insulation and render system applied over the existing walls. The proposed finish colour is 'Pearl' (below left) and 'Causeway' (below right).

As identified in the approved planning drawings, the render installation was to be provided by K Rend. Due to availability issues now associated with this product, an alternative supplier Johnstone's, will provide this installation.

Johnstone's offer a colour matching service which will see the same colours originally specified, now met by another supplier.

The Pearl finish will be applied to the majority of the building with the Causeway finish applicable to the below-damp proof course level, ranging in 200-300mm above external ground level.
