LEGEND

NOTES

Pitch based on average touring caravan between 3m to 6.5m long and 2.26m wide.

2m from road.
3m from boundary.

Bases to be fully permeable gravel grid system.

Due to road width a one way system will be implemented.

A space between 6 metres wide shall be maintained between each caravan; such space may be used for the parking of motor vehicles. This distance must be maintained when awnings are used. However, in order to restrict the spread of fire, there shall always be three metres clear space between any vehicle or other ancillary equipment so placed, and a unit in separate occupation.

All vans to be within 30m of a fire point
All vans to be within 50m of a water point but no closer that 3m
