Good afternoon Claire

[REDACTED]

The porch is in a state of severe dilapidation, the roof is scruffy polycarbonate and most of the timber is rotten. I live in the house and use the porch every day - to store recycling bins and to dry my washing etc. [REDACTED]. There is no wildlife within it - except for woodworm and woodlice...

I'm going to attach some photos.

We are nearly into Autumn and I would love to get the house more weathertight. It is so cold and draughty at the moment.

[REDACTED]

Best wishes  
Jenny
