Description of Proposed Works, Impacts and Risks

Proposed works

Please describe the proposed development including details of any dwellinghouses and other works proposed

First floor of 14 Stanley Street is currently designated as Class B1 (office). The development looks to alter this use to a Class C3 (flat)

Please provide details on the provision of adequate natural light in all habitable rooms of the dwellinghouses

The property is a well proportioned victorian terraced property. Originally a dwelling house, then converted to use as an Opticians (with office above) and then separated into 2 separate units in 2020, ground floor shop, upper floor office. All habitable rooms have the original large victorian window openings, which would have originally been bedrooms.

What will be the net increase in dwellinghouses?

1

This figure should be the number of dwellinghouses proposed by the development that is additional to the number of dwellinghouses in the existing building prior to the development.

Impacts and risks

Please provide details of any transport and highways impacts and how these will be mitigated, particularly to ensure safe site access

No impact on transport or highways.

Please provide details of any contamination risks and how these will be mitigated

No contamination risk.

Please provide details of any flooding risks and how these will be mitigated.

No flooding risk. (First floor)

A flood risk assessment should accompany the application where the site:

- is in Flood Zones 2 or 3; or
- is in an area with critical drainage problems (such areas will have been notified to the Local Planning Authority by the Environment Agency).

Check if your site location is in Flood Zone 2 or 3 online

Check with your Local Planning Authority to see if your site is in an area with critical drainage problems.

Please provide details of the impacts of noise from any commercial premises on the intended occupiers of the new dwellinghouses and how these will be mitigated

An acoustic/fire resistant floor has already been installed between the ground and first floors.

Comprising:

100mm mineral quilt, min. density 10kg/m3 laid between existing joists. 18mm resilient bars layed at right angles to joists at centres to suit plasterboards.

1 layer of 15mm acoustic plasterboard (SOUNDBLOC or sim) and 1 layer of 12.5mm FIRELINE board. Cross boarded and skim finish. Acoustic mastic to plasterboard edges. 60minutes fire resistance.

If the building is located in a conservation area, and the development involves a change of use of the whole or part of the ground floor. Please provide details of the impacts that the change of use will have on the character or sustainability of the conservation area and how these will be mitigated

The building is not within a conservation area.

uses.
Please provide details of the impacts on intended occupiers of the development of the introduction of residential use in the area and how these will be mitigated
