Hi Team,

The below applicant has just made a DOC application via the website and I'm not sure whether she's included the below in the application. If she hasn't can we possibly add it please ??

Thanks,

Nikita Mossman BA(Hons)
Planning Officer

To Nikita

please find attached my construction management plan.
could you please inform me if this will be ok .

I currently have two off road parking spaces which are mine to use daily , these will be used for delivery

of aggregates and removal of soil , i plan to have a grab lorry working on the days whilst the footings are

being done so no waste material will be left over night in the parking spaces .

whilst the ground works are being commenced i plan to use a small rubber tracked mini digger and small wheeled micro dumper to avoid any damage to tarmac on footpath , the dumper will be used to

transport soil and aggregates to and from sight .

should any mud or spillages occur these will be cleaned and tidied up straight away.

The use of the highway should be limited to loading and unloading only which i will make sure vehicles

can still pass.

No deliveries will occur before 8am or after 4pm.

i will only ever have one contractor on sight at any given time , so the parking spaces i use will be allocated to them on those days as i will park my vehicle at my nans down the road .

when pouring the footings our neighbour has kindly agreed for me to use his large driveway to have the

concrete mixer parked on to make sure the road is kept clear at all times.

All other non aggregate building materials such as timber , roofing etc will also be delivered to these parking bays and hand balled immediately to the property .

kind regards

N.Hayward
