

## Air-Con unit – 8 Market Place, Shifnal, TF11 9AZ

### Summary

The units internally are installed on the wall and not affecting any of the original beams within the building. Externally the unit is again installed to the wall and no original features of the building. Please see photos below for locations and aesthetics of the units. The external unit is located at the rear of the building out of sight of the public eye therefore not affecting any visibility of the building or wider conservation areas.
