

I can confirm that the two LED lights to the side of the entrance doors are the only External Lights on these buildings.

I attach Liz Lords ecology report with the mitigation measures recommended & can Confirm that these measures are also on the site plan drawing as part of condition 19.

With regards to a Construction Method Statement, I can confirm That this is a self build project being undertaken by the owner & builder Glen Barrell Who has recently completed construction of the existing dwelling at the far end of the Site ok. I have added a brief CMS statement to my site plan to cover access & egress to The site, storage, toilet facilities, staff room & first aid etc will all be available for all of The site operatives inside the new dwelling. The site operatives all work with the owner Anyway & they can park in the drive area outside the new dwelling.
