Subject: Re: Jw Tree Work

Hi Gary.

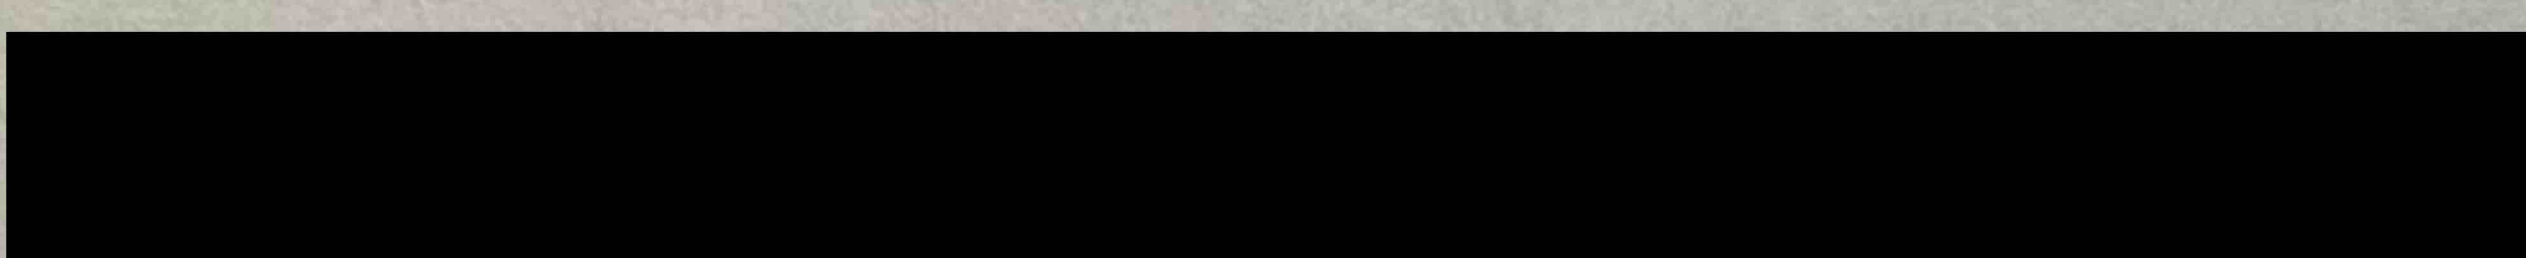

So regards to the tree in your front garden my personal professional views are the tree in question has severe canker rot at the base (stump) that's causing the tree to become very rotten, also I find the tree is now getting to the stage where it's becoming very brittle and unsafe my advice would be it needs to be removed ASAP to avoid further problems or damage.

My company is Jw tree care & landscaping services.
